### **FO/AA7JV Marquesas and Temotu –update March 30**

Now in Tikehau Atoll, in the Tuamotu group. Grid BH55 (OC-066). We have three stations in two RIB-s on a nearby motu (small island). The entire "DXpedition" was landed on the RIB Boat in minutes. All wired up with complete stations in the RIB-s, with generators and satellite as well as UHF IP bridge. Two stations are running remotely operated FT8 and one is a full power 160-10 CW/SSB station that we work locally from the boat (via the 900 MHz bridge).

### **9G4X Ghana –update**

For the past 3 days, in addition to our 9G4X operations, we have been joined by 18 Ghanaians, all seeing a DXpedition and perhaps amateur radio itself for the very first time. Seventeen of our visitors are from Ghana's National Communication Authority (NCA), their government's equivalent of the Federal Communications Commission (FCC) in the U.S. They are here to learn about amateur radio in hopes there will be opportunities to promote the hobby in a country with less than a handful of active licensed amateur operators amongst a population of about 33 million. <https://www.dx-world.net/9g4x-ghana/>

### **CY0S Sable Island –update March 30**

As of 0730Z, the CY0S DXpedition team had 78,089 QSO's in the log. Because of the uncertainty of the weather and departing the island on Friday, the team will not take down any antennas today. The team will await word this evening from Parks Canada, Sable Aviation and Vision Air Services. All three of our Sable partners are absolutely the best to work with and their assistance has greatly contributed to our success.
